

CitiusTech: Community-wide Health Record Bank

Client Requirements

Washington State Health Record Bank Project - CitiusTech was selected to design and manage development and deployment of solution to collect, manage and share electronic health information from multiple providers in the community and act as a portal for other e-health applications.

Solution - Schematic

CitiusTech Solution:

Design:

CitiusTech designed the overall solution using Web 2.0 architecture by leveraging functionalities provided by:

- Microsoft HealthVault: Patient-owned Data
- Community provided data
- State and Regional Health Info Sources

Development:

CitiusTech conducted the end-to-end development, testing and deployment of the solution

Value Delivered:

- Leveraged CitiusTech expertise in HIE and LHIN market – including IHE and cross-enterprise document sharing (XDS) experience
- Leveraged CitiusTech's hospital EMR and HIS experience
- Ensured HIPAA security and scalability of solution
