Citius Healthcare Consulting – Offerings for Life Sciences

Aug, 2024 | https://www.citiustech.com/citius-healthcare-consulting

Life Sciences – Offerings

Commercial launch and brand management
Maximize the impact of client therapies by leading launches, improving commercial processes, and driving brand performance.

Patient engagement
Support clients in designing, implementing, and improving patient support programs and enhancing the patient experience to increase access and adherence.

Clinical innovation
Provide technology leadership, subject matter expertise and support to design and develop new greenfield applications using leading edge technology through CitiusTech Engineering.

Areas of Expertise

Launch excellence
Plan, lead, and execute successful product launches through structured launch management that coordinates across multiple functions including Marketing, Commercial Ops, Portfolio Strategy & Planning, Commercial Analytics, and Commercial IT

Digital & omnichannel execution
Create and execute brand strategies that engage physicians and consumers in new and innovative ways, including digital and omni-channel capability execution, content and channel design and strategy, and cross-channel coordination

Digital & omnichannel execution: Commercial operations
Improve processes, launch new capabilities, and identify insights that power the business.

Areas of Expertise

Patient support programs (design, launch, & improve)
Design, launch, & improve PSPs to optimize the patient experience Enhancing patient outcomes through tailored support programs that ensure patients receive the guidance, resources, and care they need to achieve optimal health outcomes, better adherence, reduced dropout rates, and improved overall well-being.

Use of Real- world data to improve patient support programs (PSPs)
Leverage client data & our RWD expertise to improve patient support programs reducing dropout rates, increasing adherence, & bringing down costs. Our distinctive edge lies in our unparalleled ability to harness real-world data and analytics. This expertise enables us to deliver highly personalized and effective patient engagement solutions, setting new standards in the industry for innovation, patient-centric care, and cost-effectiveness.

Areas of Expertise

Global data platforms
Build common data solutions for anonymization using data protection techniques to efficiently access patient data.

Medical imaging
Build & implement Global Imaging Platforms including data onboarding, acquisition, curation, sharing, and integrated data products.

Gen AI – patient safety narrative
Develop Patient Safety solutions using Gen AI to help medical writers create faster and more accurate content.

Decentralized clinical trials
Build & Implement decision support systems for clinical trial activities
