

Shaping Healthcare Possibilities

Modernize Stop Loss Application for a Large Blue Plan

IBC provide Stop Loss insurance for Independence's self-funded group customers.

Stop Loss insurance can protect self-funded employers who take on the financial risk of providing health insurance for their employees against large, unpredictable, or catastrophic losses from higher-than-anticipated claims.

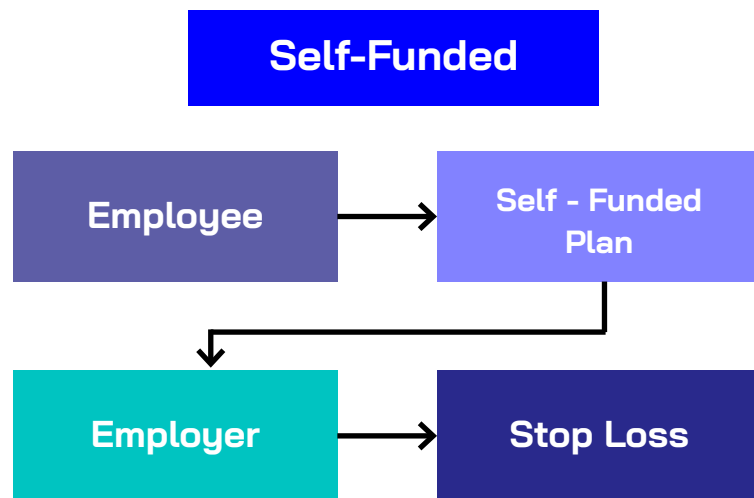

CASE STUDY

CLIENT REQUIREMENTS

IBC currently manages ~1100 group Stop Loss contracts in a legacy application & faces multiple performance and functional challenges. Project objective is to design and develop a new E2E Stop Loss application supporting multi tenancy (IBC & AHA) with configurable workflow & enhanced functionality.

Re-platform the Stop Loss application and migrate existing customers in the new platform.

CITIUSTECH SOLUTIONS

CitiusTech setup an Offshore/Onshore Development Center working as extended team of IBC business.

Key CitiusTech services:

- Gathering requirements and document user stories on a BDD model to upgrade the workflow and add new features.
- Common workflow for both the tenant (IBC & AHA) to process business rule on Stoploss.
- Reports generation for both groups of tenants.
- New interactive dashboard to track the claim.
- Develop front end and business functionality as per the stoploss workflow on the new Dot Net based platform.
- Functional, Integration, System and end-to-end QA testing.

VALUE DELIVERED

Leveraged CitiusTech's expertise in Web Development, Cloud Practice and QA Testing processes to enhance system application and improve payment accuracy.

Accelerated technology upgradation while ensuring minimum impact to business users.
