

Shaping Healthcare Possibilities

# Inventory Management Settings Automation

The traditional approach to inventory management is time-consuming and repetitive. It also poses as a significant challenge when dealing with high-volume inventory. It takes around 90 seconds each to process 400 inventory items every week.

This means our client spent 10 hours per week processing inventory. To counter this, we introduced an unattended BOT to execute the entire inventory processing workflow.

Secured Data storage, Minimum training time, and high scalability are a critical component of our Unattended BOT solution.

**CASE STUDY**

## VALUE DELIVERED

---

95% reduction in  
FTE efforts

Reduced processing time  
to 20 seconds per item

Performance  
accuracy of 98%

Shaping Healthcare Possibilities

CitiusTech is a global IT services, consulting, and business solutions enterprise 100% focused on the healthcare and life sciences industry. We enable 140+ enterprises to build a human-first ecosystem that is efficient, effective, and equitable with deep domain expertise and next-gen technology.

With over 8,500 healthcare technology professionals worldwide, CitiusTech powers healthcare digital innovation, business transformation and industry-wide convergence through next-generation technologies, solutions, and products.
