The Challenge

- Client is a global manufacturer of ophthalmology devices for cataract surgery. It has made some strategic acquisitions based on AI Technology. Client had the below requirements:
- Assess and document current infrastructure and architecture to design new HSDP architecture
- Successfully migrate customer PHI and PII data and surgery files to hosted surgery planner web application and ensure that the flow of data between different systems work correctly post migration
- Collaborate with operations team to help perform key server and application maintenance tasks as per the operations runbook

Solution(s) & Value Delivered

The Solution

- CitiusTech migrated DevTest/ SVV and Production servers from legacy cloud infrastructure to digital health cloud infrastructure replication
- CitiusTech co-ordinated the setup of baseline infra with digital health cloud infrastructure for Staging and Production
- CitiusTech developed and executed the IQ (Installation Qualification), OQ (Operation qualification) document for each migration phase
- CitiusTech created an operational runbook and disaster recovery system for staging and prod. migration
- CitiusTech supported performance, functional , security and penetration testing requirements

Solution Highlights

- Proactively run a gap analysis management initiative for a better end user experience
- Improved operations processes as per industry standards & active directory impl. for user mgmt.
- Successfully completed migration to digital health cloud without any impact on existing customers and Operations team

Shaping Healthcare Possibilities

Thank You

CitiusTech - Shaping Healthcare Possibilities.

CitiusTech is a global IT services, consulting, and business solutions enterprise 100% focused on the healthcare and life sciences industry. We enable 140+ enterprises to build a human-first ecosystem that is efficient, effective, and equitable with deep domain expertise and next-gen technology.

With over 8,500 healthcare technology professionals worldwide, CitiusTech powers healthcare digital innovation, business transformation, and industry-wide convergence through next-generation technologies, solutions, and products
